DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-7, drawn to a catalyst.

Group 2, claim(s) 8-10, drawn to a process of making a catalyst.

Group 3, claim(s) 11-16, drawn to a process for producing a compound.

Group 4, claim(s) 17-18, drawn to a carboxylic acid or carboxylic acid ester.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Lack of unity between any one of Groups 1-3 and Group 4 is evident *a priori*; there is no subject matter common between the groups as a product of a carboxylic acid or carboxylic acid ester is independent of the method of making, catalyst used, and method of making a catalyst.

The common technical feature between Groups 1 and 2; Groups 1 and 3; and Groups 2 and 3 is the catalyst of claim 1. However, this catalyst is found in the prior art. For instance, Aldridge (US5164354) teaches a catalyst comprising a porous silica support containing a heteropoly acid. The heteropoly acid is impregnated within the pores of the support; thus, it is necessarily substantially present to a depth of 30% from the support surface. See column 2, lines 18-51 and Example 1. Therefore, the common technical feature is not considered to be a special technical feature, and thus the groups lack unity.

A telephone call was made to Sheldon Landsman on 6/3/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
